

SlashNext Complete:

[SlashNext Complete](#) delivers next-generation, multi-channel phishing protection through patented AI-powered detection for **99.9% accuracy** and 48-hour time-to-detection advantage to offer patient-zero protection in real-time.

SlashNext's cloud and on-device AI-powered detection stops spear phishing, social engineering, and other targeted human threats across popular communication channels and collaboration apps, including LinkedIn, SMS, Slack, Zoom, and others. Only SlashNext protects organizations from these malicious threats launched from legitimate, trusted sites that easily evade current SEG, proxy, SASE, and endpoint security tools.

SlashNext Email Observability:

It's hard to tell what threats may be bypassing your current email security. But with SlashNext's newest offer of 30 days in [Observability Mode](#), you can do exactly that: see what threats are evading your current email security and get personalized insights into how we do it.

SlashNext's Integrated Cloud Email with patented HumanAI™, a powerful combination of computer vision, natural language processing and behavioral contextualization, detects malicious URLs, BEC, malware and exploits in real-time. By detecting threats in real-time with 99.9% accuracy, we help organizations like yours detect and prevent threats before they become a breach.

SlashNext's goal is to stop zero-hour threats that compromise users in email, mobile, and web messaging apps like WhatsApp.

SlashNext Email Protection for Microsoft 365:

[SlashNext](#), the leader in SaaS-based multi-channel phishing protection across email, web, and mobile for the modern workforce, launches [SlashNext Email Protection for Microsoft 365](#). The new integrated cloud email service stops 65% more spear-phishing, BEC, malware, and ransomware link threats than all other cloud-native email security services. **SlashNext Email Protection for Microsoft 365 offers** organizations a powerful layer of real-time scanning, detection, and removal of zero-hour threats before they reach users with 99.9 % accuracy.

SlashNext integrates with Microsoft 365 Security and delivers simple, secure, comprehensive, accurate, and powerful cloud email protection:

- **Simple** - Five minutes from integration to protection using the Microsoft Graph API
- **Secure** – Authenticate with OAuth, securely manage tenant, and data is never stored on disk to ensure zero loss of PII.
- **Comprehensive** – Industry-leading zero-hour threat coverage for targeted human compromise attacks - credential stealing, BEC, spear-phishing, legitimate service compromise, social engineering scams, ransomware, and malware links.
- **Accurate** – Real-time scanning, detection, and removal of zero-hour threats before they reach users. 99.9% accuracy, 1 in 1 million false-positive rates, and 48-hour time to detection advantage.
- **Powerful** – Advanced search and unified security analytics enable security professionals to pinpoint threats by user and type across email, web, and mobile channels— extensible REST API integrations for leading SIEMs and SOARs, including abuse inbox management playbook.
